Automated Sealing Machine (2021 - 2022)

First Year Hardware Project

- A solution has been developed to assist organizations, including divisional secretariat offices, in streamlining their document sealing procedures. Recognizing the inconvenience of individually sealing each paper, this innovative solution allows for the efficient sealing of any number of papers through a single input. By eliminating the need for manual processing, the solution greatly enhances the efficiency and convenience of the sealing process for clients seeking an optimized workflow.

  Technologies: C language, Atmega 32 Microcontroller
  Role: PCB Designer, Microcontroller Programmer

Experiences & Achievements

- Bank of Ceylon Kudawella Branch (Sep 2019 - Oct 2020)
  - During my tenure at the bank, the branch I was stationed at achieved the highest number of approved loans nationwide for that particular year. This accomplishment brings me great satisfaction, particularly because I was part of the lending department.
